

SEIR Filter: A Stochastic Model of Epidemics

Response to Technical Check Results

February 17, 2021

Dear Editor,

I am sending the updated version of our manuscript. We made the following changes

- we changed the font to 11pt and resized some graphics in order to fit the limit 35 pages
- we changed the EM category to “OR in health services” and made this the first keyword

The third required change was to sort references in alphabetical order. Here, however, I am a bit confused, as the original manuscript does sort the references according to the surname of the first author. Please let me know if they have to be sorted different way – and maybe kindly advise us what bibliography style has to be used (we use plain.pst so far).

Your sincerely

Martin Šmíd, corresponding author
